Mission and vision

Mission statement:

” *To provide machines and equipment of high complexity and superior quality to business buyers, from manufacturing, through installation and support.* ”

We achieved the position of one of the most reputable producers of mining equipment in Europe by building and maintaining the **long-standing customer relationships**. Our customer relationships are built on extensive know-how and long-term commitment. Our superbly equipped workshops and skilled employees inspire our customers’ confidence, that each product will be produced exactly according to their requests and highest expectations, on time.

In order to meet the increasing market demands and offer ever more complex machines and equipment of superior quality, we are dedicated to **continuous investments** in the expansion and modernization of our facilities. During the last decade, over 20 million EUR was invested in broadening and modernizing of our capacities. All of these investments were conducted from own resources, from engineering, manufacturing to financing from our profits.

In the last two years, we finished the following projects in our workshops:

- sandblasting and painting facility (1000m²),
- broadening of welding shop,
- new cranes (20-120t),
- new furnaces in foundry (2 x 25t),
- new machines for material preparation.

Through the newest investments, we strive to achieve the following **goals**:

- higher productivity,
- new technologies,
- new industries (rail engineering, wind turbines),
- increase in sales for the energy sector,
- zero complaint policy.

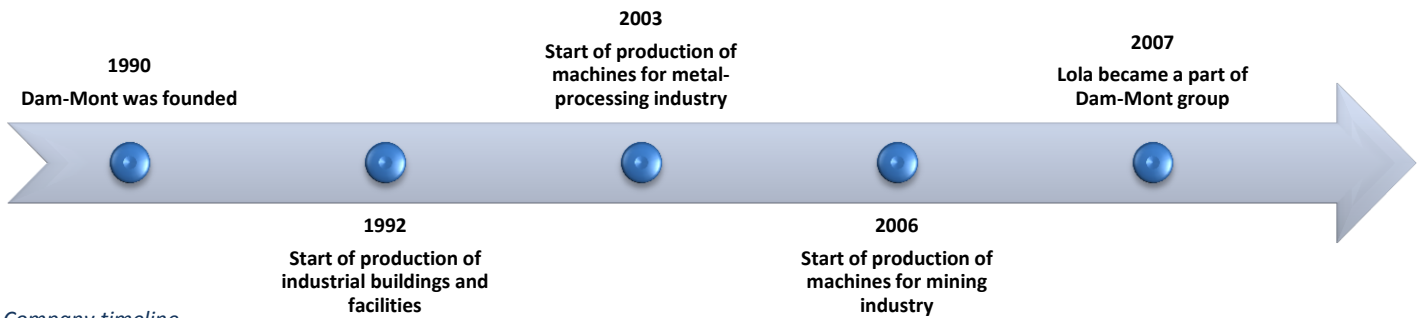

*Newest machine in our machine park: press brake
Bystronic Xpert 800 (L=6200mm)*

Company profile

Company Dam-Mont is one of the largest manufacturers of machines and equipment for mining, energetic and process industry in South-eastern Europe. Thanks to contentious efforts in delivering of high quality products and satisfying our customers, in two decades of our existence, from the producer of light steel structures, we have grown into a reputable manufacturer of machines and facilities of high-complexity and sophistication.

Company timeline

Company was founded on July 07th, 1990 in Dvorište near Despotovac. The founder and the owner is Mr. Miloško Damljanovic. Since 1992, in Münster, Germany, a second member of our group Dam-Mont GmbH began its operations, in the field of installation works and delivery of materials and components. Today, our employees in Germany provide purchasing services for the manufacturing in Serbia.

Since 2007, Dam-Mont owns Lola Livnica-Pom, Belgrade which consists of two main business units, foundry and manufacturing of process equipment and machinery. The range of products and production capacities have been considerably broadened with the acquisition of Lola production facilities in Belgrade.

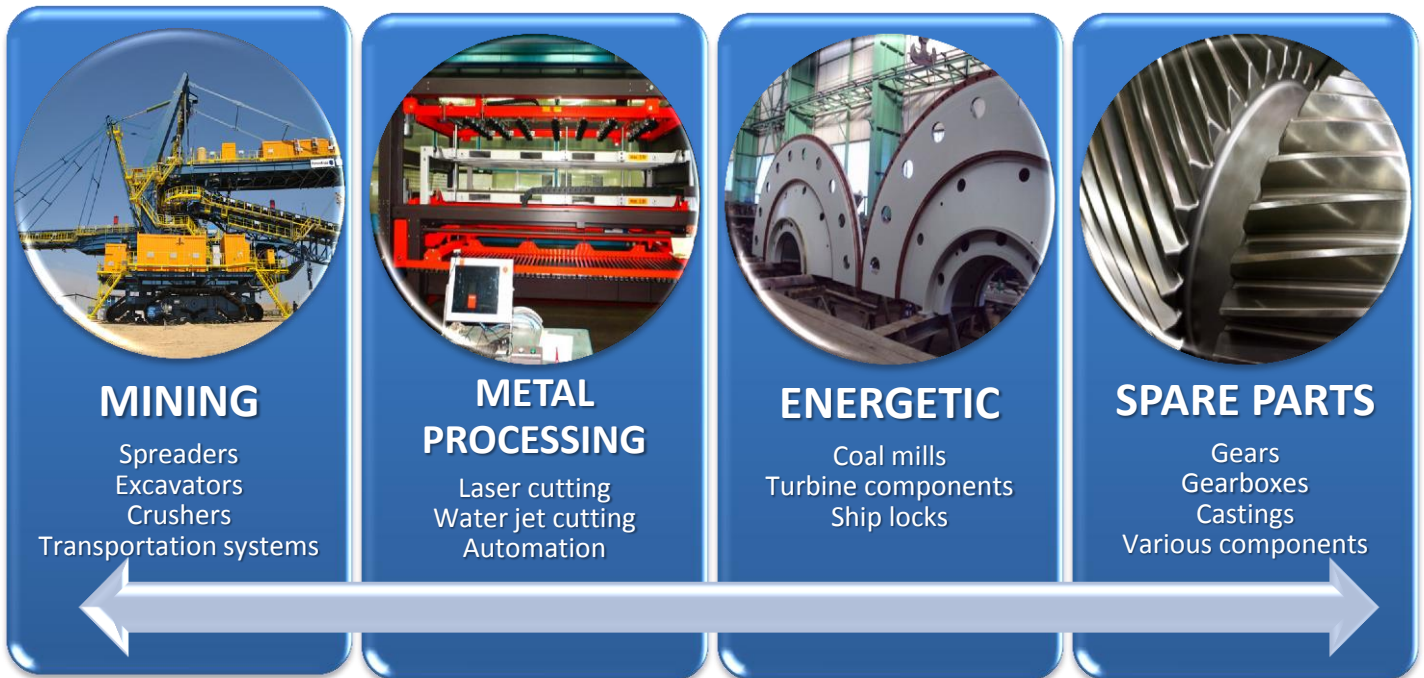

Company locations in Belgrade (Lola) and Dvorište, Serbia

Production program

During its existence Dam-Mont company gained a reputation of a company that understands the needs and desires of business customers, and delivers the products and services that fully meet their requirements. We are constantly striving to exceed the expectations of our clients. A number of successfully implemented projects and satisfied customers, clearly confirm that we have the expertise, experience and technical capacities for designing, manufacturing and installation of various machines and equipment.

Our development and production know-how, in combination with our high level of vertical integration, ensure that our customer receives versatility from a single source.

Manufacturing capabilities

Activity:

Manufacturing of machines and equipment for mining, energetic and process industry

Location:

- Belgrade and Dvorište, Republic of Serbia
- Münster, Germany
- Excellent road and rail connections, distance to the city port of only 10 km
- Direct railway link to the main cargo junction.

Company size:

- 400 employees
- 75000m² workshop floor
- More than 20 delivered machines and facilities in mining industry

Technological capabilities:

- CNC laser and water jet cutting technology
- CNC press brakes – bending
- Wide range of high precision machining
 - Turning up to $d = 15m$
 - Gearing up to $d = 8m$
 - Horizontal milling machines, $L_{max} = 26m$, $H_{max} = 4,2m$
 - Grinding (flat, round, gear grinding)
- Welding technology
- Heat treatment
- Casting

Production capacities:

- **Castings**
weight from 10kg to 25 t; total capacity 350 t/month
- **Steel structures**
single pieces up to 120 t; total capacity 500 t/month
- **Mechanical components**
single pieces up to 120 t; total capacity 350 t/month

Quality management

Quality management is an essential component of our business operations and therefore makes a significant contribution towards the continuous improvement and efficiency of our manufacturing process – to the advantage of our customers. All our products, services, activities and decisions have to meet the customer requirements, regulations and internal rules. Our company delivers products and services in the highest quality, which is achieved by:

- Using only raw-materials with the certified quality standard acceptable worldwide;
- Highly qualified workforce that has a proven record of the relevant experience from executed projects;
- A modern production process.

Quality control in our workshops is performed on a regular basis, from inputs control, through control during all production phases, to control of final product. Each product delivered from our company is checked by calibrated equipment, and covered with the attests for chemical composition, mechanical properties, dimensional reports and NDT reports.

Also, we possess fully equipped laboratories for chemical and mechanical testing, and our personnel are certified for performing of all necessary control methods. Nevertheless, we also have long-lasting partnership with scientific research institutes and organizations.

Until today, we obtained certification according to the following standards:

- EN ISO 9001:2008
- EN ISO 14001:2005
- EN 1090-2 EXC2:2008
- EN ISO 3834-2:2005
- Certification in progress: OHSAS 18001

Laboratory for mechanical testing

Spectrometer SPECTROMAXX F

ISO 9001: 2008
Certificate no. 5344 C/2012

ISO 14001: 2005
Certificate no. 2347 M/2012

EN 1090-2 EXC2: 2008

ISO 3834-2: 2005

Acquired certificates

Logistics and transport

Dam-Mont can offer complete service to its customers, not only designing, manufacturing and assembly of machines, but also the transportation and logistics services. Our company possesses its own transport vehicles for regular and oversized transport (up to 100t).

When the product is completed and approved by our quality control, it is being packed according to the customers' requests, loaded and transported to final destination. Our employees organize the obtaining of necessary oversized transport permissions, escort of vehicles and all the necessary customs procedures. Also, we have very good cooperation with most reputable European freight forwarders and transporters.

Examples of oversize transport:

Base frame on river barge, project Cöllolar-Turkey

Parts for project Esteril-Brazil

Transport crawler T250 Brazil

Parts of spreader ARS 2000, Kostolac – Serbia
